06:00	09:00	12:00	15:00	18:00	21:00
Light rain	Light rain	Heavy rain showers	Heavy rain showers	Heavy rain showers	Light rain showers (night)
Precipitation probability					
60%	60%	70%	60%	60%	40%

Forecast for Sunday 16 Jul 2023

Weather: Rather cloudy with showers merging to give periods of rain at first, however it should becoming brighter and more showery towards lunchtime. Sunny spells and scattered blustery showers will follow into the afternoon, these briefly heavy with a low chance of an isolated rumble of thunder. The showers will turn increasingly isolated by late afternoon with lengthier sunny periods developing by the evening.

Chance of cloud-free hill tops above 600m: 10% improving to 60% during the morning and becoming 90% by early afternoon.

Low cloud and visibility: Periods above 600 metres at first, lifting to become patches above 800 metres by mid-morning and clearing all summits by noon. Local ragged fragments of cloud above 800 metres during the afternoon during or around any heavier showers. Generally excellent visibility with very good air clarity and views of distant hills and landmarks, but brief reductions as showers pass through and locally very poor in cloud at first.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite somewhat lighter winds than on Saturday, it will still be unseasonably windy on Sunday with gusts of up to 40 mph at times, especially over the highest summits and ridges. This will give some significant buffeting and impede walking somewhat at higher levels, so it's worth being prepared for it to feel quite cold at height, especially as showers pass through.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 16 Jul 2023	13.8mm	36.4mm	40.6mm

Forecast for Monday 17 Jul 2023

Weather: A drier day with a few showers, these perhaps locally heavy, but much of the area will stay dry with sunny spells. A more pleasant day for hill walking with much lighter winds than over the weekend.

Maximum wind: Southwesterly 15-20 mph gusting 25-30 mph.

Chance of cloud-free hill tops 600m: 70% becoming 100%.

Low cloud and visibility: Patchy cloud above 600-700 metres at first, soon lifting and clearing all summits. Generally excellent visibility with very good air clarity and views of distant hills and landmarks, but brief reductions as showers pass through and locally very poor in cloud at first.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 18 Celsius.
At 600m: Plus 10 Celsius rising to plus 13 Celsius.
Freezing level: Well above the summits.
